“We are glad Newforma’s architecture allows us to continue to index the Nasuni system with no changes to our workflow and no additional training for our design professionals.”

Bank of America Tower and Ritz-Carlton; Charlotte, North Carolina

Challenges?

- Address rapidly growing storage and data protection needs.
- Create a scalable global file system that enables worldwide collaboration.
- Make cloud-stored project information readily accessible for PIM workflows.

Results?

- Combines on-premise hardware and software with cloud storage.
- Simplifies and centralizes management for IT.
- Makes cloud-stored project information readily accessible for PIM workflows.
