

“Across all sectors we work, they all need coordinated information, as it is valuable to us in and out of the office. We have looked to Newforma for providing that service for us – and so far, it has been fantastic.”

–Andrew Turner
Partner, Henry Riley

COMPANY OVERVIEW

Henry Riley LLP is one of the leading UK and international construction services consultancy, with twelve offices throughout the UK, and locations in Australia and South Africa. Henry Riley uses email as a critical method of communication. Initially, the firm chose Newforma Project Center as its email management solution. The firm soon realized the software had much more to offer. Now, project team members can access valuable information from anywhere in a matter of seconds.

PROJECT RESULTS

Manage Emails

“Newforma Project Center really made a difference within our business,” said Andrew Turner, Partner at Henry Riley. “We have great success stories of how people have found information from years ago that they wouldn’t have been able to find.”

Work Productively in the Field

“We are mobile people. So, we need to get our information wherever we are at any point in the day. At client meetings, we’re often asked for information out of the blue. If we can get it quickly, our clients are appreciative, but it also shows what sort of business we are. That’s powerful for us.”

Streamline Project Workflows

“We didn’t want to have a lot of different types of software applications for everyone to learn. We wanted a software application that could do many things for us to keep learning and training simple so that we could provide a great product to our clients.”

Find What You Need, When You Need It

“The greatest benefit has been the ability to find any project information in a short space of time, which has been tested when issues have arisen from old project. We’ve been able to provide all the required information to satisfy the requester.”
