❋® NEWFORMA®

NEWFORMA TO PROCORE®

Our connectors automate the seamless exchange of project information and preserve the project record. We enable you to focus on the work you love.

DESIGN TEAMS PREFER DESIGN WORK OVER CONSTRUCTION ADMINISTRATIVE WORK

Newforma's Procore connector makes Construction Administration easy. Our connectors keep design and construction projects organized, on track, and protected.
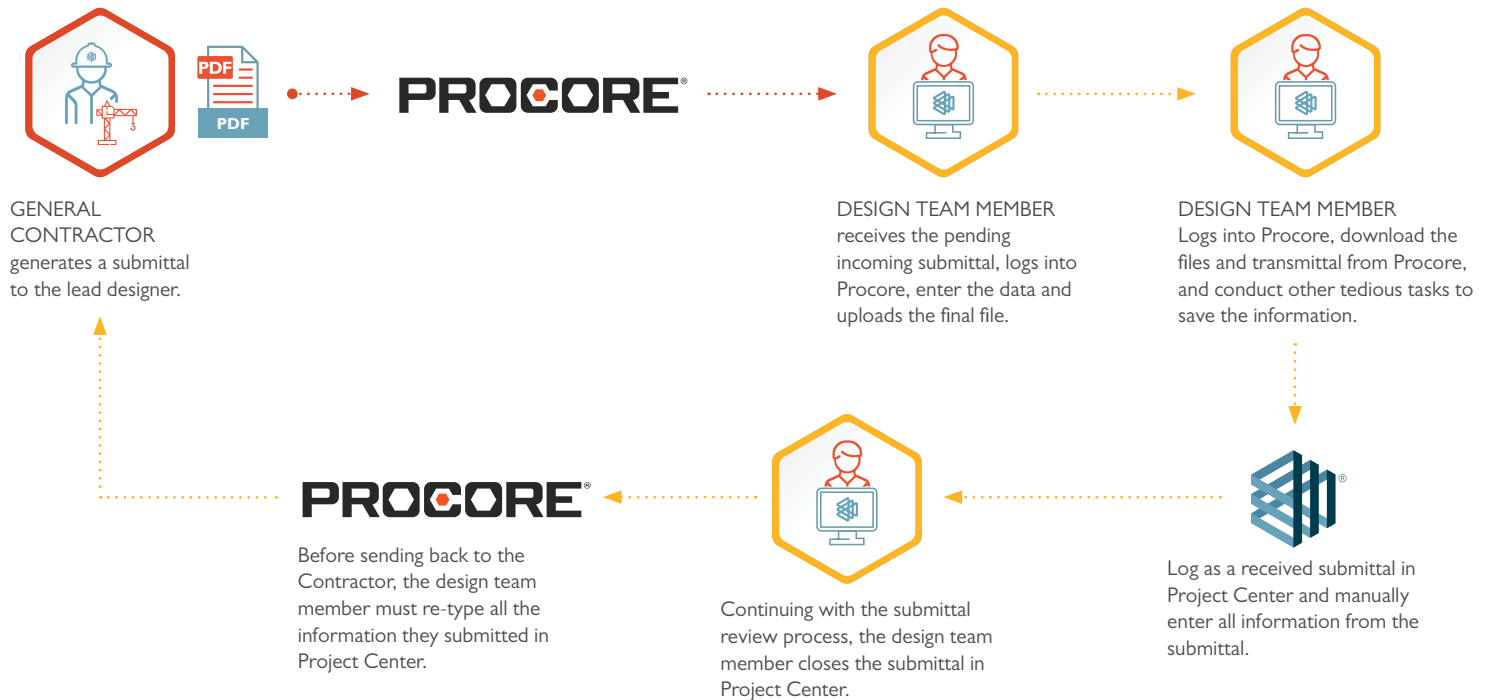

- Eliminate manual double-entry.
- Speed RFI and submittal turnaround time.
- RFIs and Submittals automatically sync between Procore and Newforma, resulting in a complete project record.
- No need to learn Procore or teach contractors how to use Info Exchange.
- Retain access to RFI and submittal data when the project is archived.
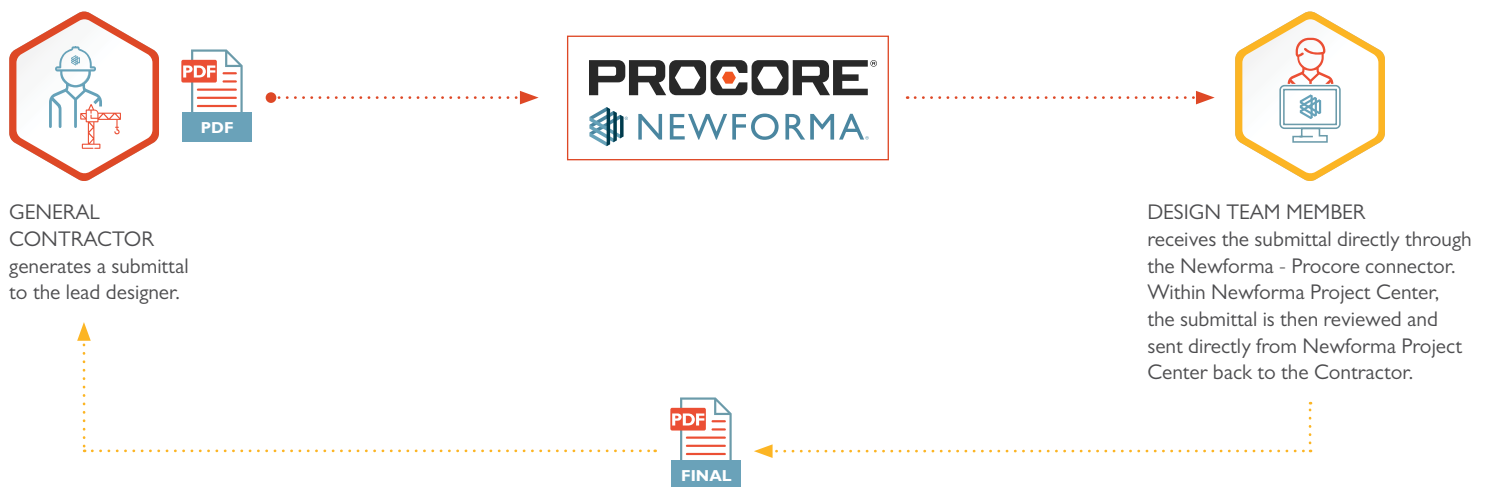

CONTRACTORS LOVE NEWFORMA'S PROCORE CONNECTOR

You prefer working in Procore. Newforma's Procore connector makes it easy to work with architects and engineers.

- Simplify and streamline workflows.
- Automate the transfer of RFI and submittal information to the design team.
- Maintain consistent and accurate records for construction meetings between project team members.
- Automatically receive RFIs and submittals back when the review process is complete without contacting design teams to respond to Procore.

Access to this integration requires a Newforma Project Center Enterprise Edition license.

Workflow **without** the Newforma - Procore Connector

PROCORE

GENERAL CONTRACTOR
generates a submittal to the lead designer.

DESIGN TEAM MEMBER
receives the pending incoming submittal, logs into Procore, enter the data and uploads the final file.

DESIGN TEAM MEMBER
Logs into Procore, download the files and transmittal from Procore, and conduct other tedious tasks to save the information.

PROCORE

Before sending back to the Contractor, the design team member must re-type all the information they submitted in Project Center.

Continuing with the submittal review process, the design team member closes the submittal in Project Center.

Log as a received submittal in Project Center and manually enter all information from the submittal.

Workflow **with** the Newforma - Procore Connector

PROCORE NEWFORMA

GENERAL CONTRACTOR
generates a submittal to the lead designer.

DESIGN TEAM MEMBER
receives the submittal directly through the Newforma - Procore connector. Within Newforma Project Center, the submittal is then reviewed and sent directly from Newforma Project Center back to the Contractor.
