

CONTRACT MANAGEMENT

Boost project performance by analyzing time spent on project workloads during Construction Management.

Manage document and contract changes with ease throughout the project's construction phase

Newforma's Contract Management Module provides a comprehensive solution for managing all aspects of the construction phase of a project. Optimized for design firms who need to quickly receive, review, and return documents across many projects all within Newforma Project Center and Info Exchange. Consistent and repeatable processes reduce risk by ensuring all items are managed accurately on every project.

Single Pane of Glass

Connect your workflows

Procore®

Bluebeam® Studio Prime

VisiSpecs™

KEY BENEFITS

Organize and Automate

Provides a single view of document status, email communication, and record copies

Minimize data entry and speed up review cycles by automatically logging and creating transmittals

Automatically relate documents to see the path from a Change Order back to an RFI

Streamline Cumbersome Workflows

Receive, review, and return documents all within Newforma Project Center and Info Exchange

Track which Specification Sections have Submittals associated with them to measure progress

Bridge the Gap from Field to Office

Streamline Site Visit and Daily Report creation with the Newforma Plans or Capture mobile apps. Collect and sync observations from the field and create a report in record time.

Improve Project Delivery

Easily collaborate on CM workflows using Newforma Info Exchange

See status and analyze turnaround

Improve awareness of project documents such as RFI answers or reviewed Submittals

Extend Capabilities with Newforma Project Center Enterprise Edition

Automate the RFI and Submittal review process through integrations with Procore and Bluebeam Studio

Expedite the creation of Expected Submittals through integration with VisiSpecs

“During my last project – a \$135 million multi-phase classroom/office building for a major university – both the owner and the contractor would come to me for communications they could not find in their own files. Because of the ease of tagging email to a Newforma Action Item, RFI, or Submittal, I was always able to find what they were looking for.” – LMN Architects

“Newforma’s Project Center Contract Management Edition is a complete and mature solution. Project Center provides for easy access and simple navigation to project information wherever it resides.” – George Hager, Principal, Director of Operations, SERA Architects
